Education

American University of Sharjah, United Arab Emirates, Sharjah

[August 2023 -Present]

Bachelor of Science in Computer Science

CGPA: 3.78/4.00

- AUS Dean's List Award recipient for all semesters enrolled (6×).
- AUS Chancellor's List Award recipient for all years enrolled (3×)

Coursework: Design-Analysis of Algorithms, Software Engineering, Computer Security, Database Systems, Operating Systems, Artificial Intelligence.

Experience

Appro Onboarding Solutions FZ-LLC | FinTech Onboarding Platform

Production Support and AI Ops Intern

[June 2026 - July 2026]

- Built and hardened a production call-recording verification pipeline against the 3CX Config API, catching audio/duration mismatches and eliminating **false-positive alerts across 100% of daily call recordings**.
- Engineered a governed, LLM-maintained knowledge wiki based on **Andrej Karpathy's LLM Wiki** with automated citation auditing, achieving **0.95+ correctness vs. 0.05-0.5 for the production RAG baseline** in blinded evaluation.
- Automated the full vendor-onboarding contract pipeline, including document generation, vendor name screening and stakeholder notifications, eliminating manual document handling across the entire case workflow.

myZoi | Financial Inclusion Technologies

Summer AI/Innovation Intern

[July 2025 - August 2025]

- Developed AI-driven Smart-FX Forecasting System achieving **99.2% R² accuracy** across multiple currencies.
- Optimized Random Forest models with **82.3% feature reduction**, **3× faster processing**, and **60% memory savings**.

Student Researcher – AUS College of Engineering

Student Research Assistant

[October 2024 - Present]

- Collaborating with a research team of six under the guidance of a faculty advisor to develop a machine learning model for real-time Emirati Sign Language translation.
- Employing **Mediapipe** and **OpenCV** for integrating computer vision technologies.

Projects

AUS-Social Dynamic Web Application [\[Link\]](#)

- Built a full-stack model social platform using Java, Jakarta Servlets, JDBC, MySQL, HTML, CSS, and JavaScript, enabling authenticated users to create posts, browse a dynamic feed, interact through likes, explore an interactive campus map, and manage personal profiles as part of a Web Application Programming final course project.

Unity 2D Platformer Game [\[Link\]](#)

- Designed a pixel-themed platformer shooter game for a **game jam** organized by the AUS Games Development Club.

Technical Skills

Languages: C++, C#, C, BASH, Python, JavaScript, R, MATLAB, x86 MASM/FASM Assembly, Java, SQL.

Tools: Git, Logisim, Cisco Packet Tracer, Wireshark, POSIX, Jakarta Servlets, MySQL Workbench, JDBC, Docker, Kubernetes, Helm, ArgoCD, AWS (EC2), Spring Boot, React, Neo4j & Cypher, Jenkins, Jira, Confluence.

AI/Agentic Engineering: Claude API, MCP servers, RAG systems, multi-agent orchestration.

Achievements/Extracurriculars

- TA for Precalculus at the AUS Department of Mathematics and Statistics for the Spring 2024 semester.
- Tutor at the AUS Math Learning Center for the Spring 2024 semester
- TA for C++ Lab at the AUS Department of Computer Science and Engineering for the Fall 2024 semester.
- Completed the **Biomedical Researchers** research ethics course on CITI Program [\[Link\]](#).
- Completed the **Deep Learning A-Z 2024: Neural Networks** certification on Udemy [\[Link\]](#).
- Peer Leader at the AUS Student Leadership Program for the 2024-2025 academic year.
- Team Leader at the AUS Student Leadership Program for the 2025-2026 academic year.
- Completed the **Building with the Claude API** course [\[Link\]](#)
